

Readiness for the guest experience.

Build the response plan around your property, your operations, and the people who depend on them.

YEARS OF EXPERIENCE

Connect agreements, operating procedures, and property planning before a loss—with NorthStar resources ready to support a response tailored to your needs.

A practical path to readiness.

Bring the right decisions forward, so a loss does not become the starting point for your response planning.

01 Align the agreement

Establish the master services agreement, work order model, and pre-established pricing.

02 Connect procedures

Integrate NorthStar into your standard operating procedures and define how the teams work together.

03 Understand the property

Use pre-loss building assessments, asset monitoring, and preventative maintenance planning to inform priorities.

04 Prepare the response

Plan for your individual needs, with access to infrastructure, construction, and roofing capabilities.

PREMIER RESPONSE

Put the program around the plan.

Agreement advantages

No retainer and pre-negotiated pricing.
No-cost priority response is available through the master services agreement.

Ongoing support

Dedicated account and operations managers, weather updates, training, pre-loss assessments, and spatial exposure mapping.

Program terms are established in the agreement. Recovery work is separately scoped and priced.

Start with your property.

Connect with NorthStar about a readiness plan.
