

COMMERCIAL REAL ESTATE / RECOVERY & READINESS

A recovery plan for every property you manage.

Owners need informed decisions. Property teams need a workable plan. NorthStar connects restoration and repair with building access, tenant priorities and the approvals that move recovery forward.

**One building.
Several sets of
priorities.**

Damage to a suite, lobby or shared corridor brings different responsibilities into the same recovery. Ownership approves the work; managers handle access and tenant communication. NorthStar helps turn those property requirements into an agreed restoration and repair plan.

RELEVANT EXPERIENCE / THE WORK BEHIND THE RESULT

JLL / HSBC: recovery across a portfolio

National

portfolio program · 2009 to 2015

Jones Lang LaSalle / HSBC | 2009 to 2015

NorthStar's historical master service agreement with Jones Lang LaSalle and HSBC supported fire, water and disaster recovery across a national portfolio during 2009 to 2015. It is not a current-contract claim.

01 The challenge

Jones Lang LaSalle and HSBC needed recovery support across a national property portfolio. Regional storms and severe freezing weather could affect several locations at once, adding simultaneous property needs to local fire and water losses throughout the country.

02 The work

Under a master service agreement from 2009 through 2015, NorthStar supported fire, water and disaster recovery across the portfolio. Before Hurricane Sandy, the team worked with JLL and provided twice-daily weather updates. NorthStar then recovered multiple HSBC properties and later responded to pipe breaks during severe Northeast cold.

03 The milestone

The historical program supported recovery across multiple properties after regional events and local losses. The 2009 to 2015 period describes documented experience, rather than a current customer agreement or service guarantee.

MORE RELEVANT EXPERIENCE

Chase Tower: Water Recovery | 2014

Vertical building complexity

A sprinkler-supply loss on floor 49 affected upper floors and reached floor 15. Drying and selective demolition took about two weeks.

BEFORE THE NEXT INTERRUPTION

Start with the property you know best.

Choose one property for a readiness discussion with its manager and building engineer. Use the building's actual access conditions, tenant responsibilities and approval process to make the conversation specific.

Authority and approvals

Who can authorize emergency work, approve changes and brief ownership on recovery decisions?

Access and occupancy

Which entrances, loading routes, occupied areas and working hours will shape the work?

Tenant responsibilities

Who owns each affected space, and who will keep tenants informed as recovery progresses?

CAPABILITIES TO SHAPE YOUR PLAN

Water damage recovery

Fire and smoke restoration

Microbial remediation

Hazardous-material
abatement

Selective demolition

Repair and reconstruction

YOUR NEXT CONVERSATION

Review one property's recovery plan ↗

Bring your property manager and building engineer into a NorthStar readiness discussion about access, authorization, tenant responsibilities and the information your building team needs.
