

EDUCATION / RECOVERY & READINESS

Plan recovery around the places students depend on.

Classrooms, residence halls and dining spaces serve different needs on the same calendar. NorthStar helps campus and district teams plan physical recovery around the buildings and services they need first.

The calendar changes which buildings matter first.

A classroom, residence hall or dining area supports a different part of student life. A recovery plan should reflect those functions and the dates that matter. NorthStar addresses building damage and repairs while institutional leaders set priorities and determine reopening.

RELEVANT EXPERIENCE / THE WORK BEHIND THE RESULT

UNC Wilmington: a campus returned in stages

130

buildings in the recovery scope

UNC Wilmington: Hurricane Florence | 2018

At UNC Wilmington after Hurricane Florence in 2018, recovery covered 130 buildings. First building turnovers began after four weeks; that milestone does not mean all buildings were complete.

01 The challenge

Hurricane Florence damaged residential and other campus facilities at UNC Wilmington in September 2018. Students were displaced and the academic calendar was disrupted. The recovery required work across a varied building portfolio, including nearly one million square feet of affected residential interiors.

02 The work

NorthStar expanded from an initial building assignment to remediation and emergency reconstruction across 130 buildings. The team deployed 750 recovery workers, temporary power and structural drying resources. A command center supported communication with the university as crews worked across the campus and prepared buildings for phased turnover.

03 The milestone

First building turnovers began after four weeks, with recovery continuing across the campus. The milestone describes the start of handovers to the university, rather than completion of every building in the 130-building scope.

Rockport-Fulton High School | 2017

School reopened in 41 days

Temporary classrooms and restrooms helped the school reopen 41 days after Hurricane Harvey landfall while reconstruction continued. Reopening milestone; the full project continued afterward.

BEFORE THE NEXT INTERRUPTION

Put the academic calendar beside the building list.

Bring facilities, operations and the authorized decision-makers together before an incident. Match priority buildings to the services they support, then discuss the dates and temporary arrangements that would shape recovery.

Priority buildings

Which classrooms, residences and service spaces need to return first, and what functions depend on them?

Decision contacts

Who can authorize emergency work, approve changes and keep campus or district leadership informed?

Calendar and alternatives

Which dates, occupied areas and temporary arrangements will influence access and the order of recovery?

CAPABILITIES TO SHAPE YOUR PLAN

 Fire and smoke restoration

 Water extraction and structural drying

 Moisture assessment

 Mold remediation

 Selective demolition

 Repair and reconstruction

YOUR NEXT CONVERSATION

Review your campus recovery priorities ↗

Bring your priority building list to NorthStar. Discuss the calendar, essential services and authorized contacts that should guide physical recovery across your campus or district.
