

COMMERCIAL REAL ESTATE / THE RECOVERY PRIORITIES

Your property. Their business. A coordinated recovery.

Prepare for property damage with a recovery partner that connects site knowledge, restoration and reconstruction to the priorities of owners and managers.

A building loss reaches beyond the damaged space.

An affected suite, lobby or shared corridor can change how a property operates. Owners need clear priorities and scope. Managers need useful information for tenants. NorthStar brings physical recovery services into that conversation, from a pre-loss review through reconstruction.

 **Know the property**

 **Coordinate around tenants**

 **Clarify the path to repair**

40+ years of experience

Emergency response · Environmental services ·
Reconstruction

COMMERCIAL REAL ESTATE / FROM SCOPE TO HANDOFF

A coordinated path through the work.

Define the physical recovery scope, connect the responsible teams and agree on the decisions needed at each stage.

01 Review the property

Identify key contacts, access conditions and recovery priorities. Review available building information with the manager and engineer.

02 Agree on the work

Define the affected scope and work boundaries with the property team. Confirm how approvals and tenant-facing updates will be handled.

03 Coordinate recovery

Sequence restoration and necessary material removal around site conditions, access and the property team's operating priorities.

04 Plan the reconstruction

Bring repair needs and reconstruction options to ownership. Agree on the scope and handoff requirements for the affected spaces.

The people behind the decisions.

Owners and asset managers

Set recovery priorities, approve scope and distinguish immediate repairs from elective capital improvements.

Property teams and engineers

Coordinate access, building information, tenant updates and the operating conditions that shape the work.

NorthStar recovery team

Assess physical recovery needs and coordinate agreed restoration, remediation and reconstruction work.

SERVICES TO SHAPE THE SCOPE

- Water damage recovery
- Fire and smoke restoration
- Microbial remediation
- Hazardous-material abatement
- Selective demolition
- Repair and reconstruction

COMMERCIAL REAL ESTATE / THE NEXT CONVERSATION

Relevant experience. Real project scope.

Jones Lang LaSalle / HSBC | 2009–2015 ↗

A portfolio recovery framework

A historical national MSA supported fire, water and disaster response across properties, including Hurricane Sandy losses.

Historical project experience; not a statement of a current contract.

Chase Tower: Water Recovery | 2014 ↗

Vertical building complexity

A sprinkler-supply loss on floor 49 affected upper floors and reached floor 15. Drying and selective demolition took about two weeks.

Four questions to bring forward.

01 Which suites, common areas or building functions should guide recovery priorities?

02 Who can authorize work, and how will ownership receive scope and progress updates?

03 What access, loading routes and working hours must the recovery plan account for?

04 Who coordinates tenant communication and landlord-versus-tenant responsibilities?

Start with one property.

Bring your property manager and building engineer into a readiness conversation about contacts, access, site information and recovery priorities.
