

EDUCATION / THE RECOVERY PRIORITIES

A clear path back to learning.

Plan facility recovery around the classrooms, student services and shared spaces your district or campus needs most.

Every building supports a larger mission.

A closed classroom, dining area or residence hall affects more than one space. NorthStar helps facilities teams address physical damage, define recovery work and coordinate restoration around the institution's priorities.

 **Learning spaces**

 **Essential student services**

 **Campus coordination**

Emergency response · Environmental services ·
Reconstruction

EDUCATION / FROM SCOPE TO HANDOFF

A coordinated path through the work.

Define the physical recovery scope, connect the responsible teams and agree on the decisions needed at each stage.

01 Prepare by building

Record priority functions, site contacts and access requirements before an incident through pre-loss planning.

02 Assess the affected areas

Evaluate physical damage and define mitigation priorities with the facilities team and authorized decision-makers.

03 Coordinate the recovery work

Agree on work areas, sequencing and updates so campus leaders can plan around the restoration effort.

04 Restore and document

Complete the agreed repairs and provide project updates. The institution and relevant authorities determine reopening.

The people behind the decisions.

Facilities and operations

Define building conditions, utilities, access and the spaces needed to support essential functions.

Campus or district leadership

Set operating priorities and coordinate decisions affecting instruction and student services.

Risk and procurement

Confirm work authorization, reporting needs, contract arrangements and insurance coordination.

SERVICES TO SHAPE THE SCOPE

- Fire and smoke restoration
- Water extraction and structural drying
- Moisture assessment
- Mold remediation
- Selective demolition
- Repair and reconstruction

EDUCATION / THE NEXT CONVERSATION

Relevant experience. Real project scope.

UNC Wilmington: Hurricane Florence | 2018 ↗

130 buildings

Emergency work covered a wide campus footprint. First building turnovers began after four weeks.

First turnovers, not completion of all 130 buildings.

Rockport-Fulton High School | 2017 ↗

School reopened in 41 days

Temporary classrooms and restrooms helped the school reopen 41 days after Hurricane Harvey landfall while reconstruction continued.

Reopening milestone; the full project continued afterward.

Four questions to bring forward.

01 Which buildings and functions need to return first?

02 Who can authorize emergency work and approve scope changes?

03 What access restrictions or occupied areas affect the work?

04 Which calendar dates and temporary arrangements shape recovery priorities?

Build your campus recovery plan.

Start with priority buildings, authorized contacts and the services each space supports. Ask NorthStar about pre-loss planning.
