

TECHNOLOGY / RECOVERY & READINESS

The facilities behind your technology.

Plan physical-site recovery around building conditions, controlled access and the technical teams responsible for your operations.

Site conditions

Identify affected spaces, water pathways and environmental requirements with the facility's technical team.

Controlled access

Define authorized entry, work boundaries and routes for material removal around sensitive areas.

Technical coordination

Align physical recovery with owner-led decisions about power, cooling, system isolation and restart.

SERVICES TO SHAPE THE SCOPE

- Physical damage assessment
- Fire and smoke restoration
- Selective demolition
- Water extraction and structural drying
- Mold remediation
- Repair and reconstruction

RELEVANT EXPERIENCE

Pentagon Renovations | 2001–2011

Phased government-facility work coordinated abatement and demolition around active building services.
